A study of Superiority, Responsibility, Control and violence.

Why are people fighting?

Violence in the world has a flow, every relationship works the same way. Nations are led by humans. Leaders are expected to have stature...Gravitas. It is extraordinary to find a political leader that does not feel extremely important and therefore superior. Our system is fatally flawed. We have allowed money to control who are our Leaders. When leaders lose sight of there average citizens needs and rights they are missing their responsibilities. Some Leaders feel co-operation and control can be achieved through force, they are setting the stage. Citizens see what is happening. Our citizens are becoming divided and argumentative as well. Frustration is running quite deep. The fuses have been lit.

How does the USAs leaders handle citizens?

I would like to start by defining Leaders. We have elected officials that we call our Leaders. They are in fact our employees that are charged with handling affairs in our society. We gave them the keys and they locked us out. Now our Leaders have become our masters. We have given them the store, lock, stock, barrel and cash register. This has not worked well in business and is yet to show success in our affairs.

Citizens in the 99% status are mostly ignored as I see it. I have tried to contact dozens of politicians about campaign finance and climate sinkholes. Emails and phone calls...facebook and no responses from anyone except how to contribute. It is silly to speak of "Free Speech" unless it has a BIG check attached. Most of us cannot afford to pay for our "fee" speech... NOT A TYPO

What about Drug Policy and incarceration...

Drug policies are anti citizen and Police are expected to enforce unfair laws in my opinion.

Criminals are being CREATED. For simply enjoying your life you can be harassed and jailed...Lose your property and lively hood all from oppressive foolish laws. Everyone deserves to be left alone regarding lifestyle that is not PHYSICALLY harmful to another.

Major educational awareness programs about drug consequences are needed. Strong Government influence to facilitate purity and give counseling. If they become addicted, don't steal, get help. Relay this message of fairness to the population, let the non violent out of jail.

Once the citizens see concern with a plan they should be more co-operative. Then we expect citizens to respect reasonable laws. When law is fair we expect citizen participation and help in police matters.

Once again, Police should hold parties and make friends with the neighbors...free food...music...dance with a COP.....help society create moral citizens. Many children come from a place we cannot imagine. They are tomorrows citizens. Reject violence on ALL sides, this is the only way I can see has a chance. Co-operation...trust...respect may follow.

Is Drug policy protecting citizens?...

Drug policy is not working and destroying the USA, families and lives not only here but look at Mexico and South America. Who do our Leaders think they are protecting? The police are becoming enforcers of UNPOPULAR policies, this never ends well. Cannabis has been found exceptionally affective by the National Cancer Institute and is used regularly by citizens and I believe many politicians as well. Self righteous arrogance by our leaders is shameful. This should be addressed COMPLETELY tomorrow, they have NO RIGHT to treat us this way. THEY ARE OUR EMPLOYEES.

How do our Leaders handle other Nations?

This will sound sarcastic but it is simply factual. Our leaders demand respect from all countries regardless of differences. We expect them to trust us and we give them money to buy weapons and things from us. All we ask is their resources and it may impact their land but there are "co-operative" (usually quite strong) leaders we can sway. Rarely are they honest or respected. I think the actual population of other nations that are moral understands our affects. The average US citizen thinks we are the suckers but it appears we normally benefit and others...not as much.

Owners of wealth are political policy makers, have NO illusions, the wealthy call the shots. If 1%ers suspect a social trend toward distribution of resources...land and such, the USA will sanction that country or likely worse. Others react poorly to that. Co-operation is better from trust respect and warm hearts.

Why so much violence and police citizen confrontations?

Police are in a terrible situation. Simply doing their job makes them disrespected by many. When someone disrespects me I do not react well. It is a spiral vortex leading to confrontation and possible deadly outcomes. I believe arrests are success in their Police LEADERS world. Police should hold parties and make friends with the neighbors...free food is cheaper than bullets and body bags. Co-operation...trust...respect may follow.

If you react badly to disrespect and escalate it, I believe the following statement can change your life. It is EXTREMELY empowering to meet disrespect with PROFOUND genuine respect. A very warm heart in a frozen atmosphere can help temper chills. Cold hearts need a little cuddling with a warm friendly smile. Your brother may be having troubles.

What could lead to this anger we see everywhere?

There is a process here AS WITH ALL THINGS...a cascade of easy to see events that will INEVITABLY occur. When people feel superior...more important...arrogant...dis-respectful...this will not be well accepted by others...usually met with contempt and counter disrespect...injured prides follow...no co-operation.....honor is at stake...counter nastiness follows...met by the same...insults then violence...injuries...death and hatred...children scream and bleed....send in the boys to defend our country and way of life...they had no right to do what they did...dont talk to them ...bring them to their knees...then the wackos take charge on both sides. The vulnerable always resort to terrorism 1st, that is their ONLY voice, we wont talk...Drones are sent...TODAY you see our policy, I think we need to talk to our enemies unless we want them as enemies FOREVER. We are bullies.

What about Human Nature?

I would like to make some points about the nature of humans. These are assumptions but quite accurate I feel. Some people will not be happy with their situation and may blame their rulers. Some are simply complainers. However as we know Leaders are frequently corrupted by lack of supervision and influences of money. If the rulers are the problem, the society must be able to correct this. I believe a "(YOUR NATION HERE) Citizens Forum" should be setup and there should be a WEBSITE for EVERY Nation. When people have No voice it ends up with frustration creating violence motivated by a feeling of futility dealing with this feeling of LONELY anger. We need a co-operative Respectful voice. If there is no path to repair, we should NOT simply complain. Expose whatever the issue is but then present Solutions ONLY. The same old political system does NOT WORK...it ends up with what we have in the USA now. Unless you are way up toward the 1% income... You and I are simply ignored. Let them hear our voices.
