

Atlantis ...The draining of the Sahara
11-10-2015

What am I basing this document on?

Primarily On Plato...His lineage in recording and keeping the ancient stories pure is convincing. "My great-grandfather, Dropidas, had the original writing, which is still in my possession, and was carefully studied by me when I was a child." His great grand father got it from SOLON. "There can be no question that Solon visited Egypt....for ten years and learned everything of their ancient past." this work...was in his blood line. Is there proof positive here or simple speculation?

Truth is nobody has a real solid claim here. I like my evidence. roger@mudfossils.com

We all know about Atlantis but What is the "Eye of the Sahara"?

It is an anomaly in west Sahara (Mauritania) and it appears to have drained an Ocean which existed there 11,400 years ago approx. The EYE is 25 miles wide and displays the ring architecture almost exactly as Plato describes. Its center consists of a siliceous breccia [1] covering an area that is at least 30 km in diameter. The Eye has dropped and a canyon like the "Grand canyon" and huge.... 25 miles wide and Incredible sediments eroded into the ocean. (Grand canyon 4-18mi wide).

Are there similarities and structures in this Eye agreeing with Plato?

EVERYTHING...every detail is exact...dimensions...topography...straits...structures.. inlets...bridges...history and more. Video

Would this create a giant mudflow?

Plato was very impressed with the mudflow and says YES..."Many great deluges have taken place during the nine thousand years, for that is the number of years which have elapsed since the time of which I am speaking; and in all the ages and changes of things there has never been any sediment of the earth flowing down from the mountains, as in other places, which is worth speaking of." "When afterward sunk by an earthquake, became an impassable barrier of mud to voyagers sailing from hence to the ocean." The Mother of all mudflows...Easily seen from space.

What is this about an Ocean in the Sahara?

This is fully understood. Whale bones and sea creatures of all sorts are found there. They say it was an ocean 20,000yrs ago. They say 5000yrs ago the Sahara was fertile grasslands. They also say the reason it went from Ocean to desert is Earths axis wobble. I say that is not possible.

Rain will vary that is fine but not to that extent. The topographical evidence is quite obvious from space. The Earthquake breached the divide between oceans. It is possible that Plato referred to a "Strait" in front of Atlantis, (maybe later Solon or such figured must be Hercules) HOWEVER there is a divide in front of the eye and possibly a strait but???

Atlantis was outside the "Straits of Hercules" ...Possibly NOT the Straits of Hercules?

I feel due to the architecture of the opening of the "Eye Gash" it is possible Atlantis was just outside another "Strait" and not Gibraltar...this is pure speculation on both sides again. This is my evidence. It appears very apparent that the "Drain" is through a SET of SOLID non erodible material Possibly PILLARS. The slot would be TOTALLY different...not as steep and MUCH broader. I feel It is possible that Gibraltar was so obvious as the Straits that it was added but not correct. [2]

What does Plato say about the origins of Atlantis?

"The tale, which was of great length, began as follows: I have before remarked, in speaking of the allotments of the gods, that they distributed the whole earth into portions differing in extent, and made themselves temples and sacrifices. And Poseidon, receiving for his lot the island of Atlantis, begat children by a mortal woman, and settled them in a part of the island which I will proceed to describe. I believe this as I have Giants that are DNA tested 100% human and over 90ft tall that were found with average size humans. <https://www.youtube.com/watch?v=h5xDYJb9>

What else does Plato say about Atlantis?

"Atlantis, which, as I was saying, once had an extent greater than that of Libya and Asia;(this makes

sense if it was waters under their control) and, when afterward sunk by an earthquake, became an impassable barrier of mud to voyagers sailing from hence to the ocean. There has never been any sediment of the earth flowing down from the mountains, as in other places, which is worth speaking of. the mere skeleton of the country being left. [EXACTLY what is seen in the video]

Ethiopian history says "strangers from the west arrived fully sophisticated in every way out of the mud".

Could Santorini or Crete be Atlantis?

If Plato is believed ...absolutely not. Santorini etc were volcanic events and Plato CLEARLY says and describes earthquake activity not volcanoes whatsoever.

Next the time is way off. Minoans (Crete, Santorini) was only about 4,000yrs ago or so Atlantis 11,400 if Plato is your source. Next Plato describes this..."sediment of the earth flowing down from the mountains". Not ash into the air. Next...Even the Palace at Knosis was not of Atlantean refinement. This is Platos Atlantis.."The entire circuit of the wall which went round the outermost one (80 miles) they covered with a coating of brass, and the circuit of the next wall they coated with tin, and the third, which encompassed the citadel flashed with the red light of orichalcum." All fancy metals possibly used as some form of electrolysis, power...who knows.... and it needs testing.

Are there others that speak of These times?

Yes absolutely. What about distinct separate cultures and customsperhaps due to African migrations and assimilation? In 1915 Du bois wrote about "ETHIOPIA AND EGYPT" in a book called "The Negro" with "the words and Language of the times". It is a very illuminating history of the peoples and movements in Africa. He states "The history of Egypt is a science in itself. Before the reign of the first recorded king, five thousand years or more before Christ, there had already existed in Egypt a culture and art arising by long evolution from the days of paleolithic man, among a distinctly Negroid people. About 4777 B.C. Aha-Mena began the first of three successive Egyptian empires. This lasted two thousand years, with many Pharaohs, like Khafra of the Fourth Dynasty, of a strongly Negroid cast of countenance."

"At the end of the period the empire fell apart into Egyptian and Ethiopian halves, and a silence of three centuries ensued." [3] This is when I feel the Atlantean Egyptians moved to the islands about 4,000 yrs ago but?.

Why would anyone believe these old stories?

I believe the 1st texts were likely most accurate. Plato is the 1st to DOCUMENT in detail about Atlantis. Much of my document will be Platos' statements. "There was an island situated in front of the straits...(possibly not Gibraltar) In a single day and night of misfortune all your warlike men in a body sank into the earth, and the island of Atlantis in like manner disappeared in the depths of the sea."

(Timaeus [BJ]) http://atlantismaps.com/chapter_7.html (warlike...sank...no volcano)
