

The Origin of Sea Serpents Dragons and Dinosaurs

Lets cut to the chase....Here is my video explaining these creatures. Not only explaining I will show solid evidence and texts to support my claims.

<https://www.youtube.com/watch?v=ubI9qkdNxl8>

Sea Serpents Dragons and Dinosaurs have been written about in all cultures and the texts still survive today....however is there any physical evidence of the accounts in Appolodorus or Ovid or Hesiod or any of the other “Historians” of those earliest Times? Yes there is.

In 2015 I was studying the eye of the Sahara and noticed what seemed to be a giant fish just above it and I mean GIANT....so I studied that area and discovered a Dragon just above that and the Dragon was attacking the Fish. And then I discovered Appolodorus 1.6.3 and was Shocked...

As you will see in the attached video the Fish and Dragon are extremely clear. (seems insane but true). This is from the Smithsonian... **“Asteroid Impacts Once Made the Earth’s Oceans Boil for A Whole Year Life had it rough back then”**

Every culture also has at least one catastrophic flood story and the Triassic (great Dying) was IMO that flood. The settling of the boiled biology left 3 layers. and the three layers were a Red bed then a gray/greenish clay and on top a black cap.....the red bed was flesh and blood mainly then the gray clay was mainly plant life result of Boiling Oceans ... and the black cap was fall out from burning and Volcanoes etc. for over a year the skies were dark.

This Boiling of the waters led to the Mudfossils which are as Yale says “Exceptionally well preserved Fossils due to Silica rich Oceans”.... From 2016 (After I gave my research to Yale they took credit)

Yales 2016 paper..... <https://pubs.geoscienceworld.org/gsa/geology/article-abstract/44/11/951/195125/Exceptional-preservation-of-soft-bodied-Ediacara>

This is my paper from 2015 on Mudfossils

“These mass die-offs could have driven early evolution, says planetary scientist Kevin Zahnle of the NASA Ames Research Center “You can picture these asteroids as a crazed tree trimmer showing up and chopping branches off the tree of life.”

The GREAT GLOBAL FLOOD was exactly that....Venus impact with Earth came to clear the insane life forms. It left 3 layers worldwide as I have stated which are the TRIassic Red bed then a gray/greenish clay and on top a black cap

I agree we were impacted but I think it was from Venus as all cultures claimed.....”A fiery Comet was Born from the feared God Jupiter” (Zeus)....then hit earth. Velikovskys’ Worlds in Collision has extreme details from almost every culture and all had the same story and dates....about 1500bc.

So to sum it up....We need to re think Mythology.
